Description

Features

- A possibility to change order status (including «Complete» and «Closed» statuses).
- Administrator can set permissions to users to have the opportunity to change the status of orders.

The main purpose of the plugin — adding the ability to change the status of the order. This function is relevant when adding your own status to the system, as well when order is processed by standard methods. For example, you can manually change order status to «Complete» status in advance or return this status to one of the initial status and process the order again. In any case, the module «Change order status» allows you to protect yourself from unforeseen situations during order processing.

Settings

Changing the status of specific order by yourself

- Log in into Magento area. Go to Sales -> Orders. Select specific order.
- Select status in drop-down list and type «Change Status».

The screenshot displays the 'Order View' page for order # 100000003, dated July 15, 2013, at 2:35:34 AM. The page is divided into several sections: Information, Account Information, Billing Address, Shipping Address, Change order status, Payment Information, and Shipping & Handling Information. The 'Change order status' section is highlighted with an orange border, showing a dropdown menu with 'Pending' selected and a 'Change' button next to it. The 'Account Information' section shows customer details: Customer Name (y tr), Email (email@email.com), and Customer Group (General). The 'Billing Address' and 'Shipping Address' sections both show the same address: John Smith, Company, Street, Oxford, Alabama, 36203, United States, T: 55555555. The 'Payment Information' section shows 'Check / Money order' and 'Order was placed using USD'. The 'Shipping & Handling Information' section shows 'Flat Rate - Fixed \$5.00'. At the top right, there are several action buttons: Back, Edit, Cancel, Send Email, Hold, Invoice, Ship, and Reorder.

Changing order status

Empowering users to change status of orders

- Log into Admin area. Go to System -> Permissions -> Roles.
- Select the role for which you would like to give permission to change status.
- Check Sales -> Orders -> Actions -> Change in Status.

The screenshot shows the 'Edit Role 'Administrators'' interface. On the left, there is a sidebar with 'Role Information' containing 'Role Info', 'Role Resources', and 'Role Users'. The main area is titled 'Roles Resources' and includes a 'Resource Access' dropdown set to 'Custom'. Below this, a tree view shows the following structure:

- Resources
 - Sales
 - Orders
 - Actions
 - Hold
 - Credit Memos
 - Unhold
 - Ship
 - Send Sales Emails
 - Comment
 - Invoice
 - Capture
 - Send Order Email
 - View
 - Reorder
 - Edit
 - Accept or Deny Payment
 - Cancel
 - Create
 - Change In Status
 - Invoices
 - Shipments
 - Credit Memos
 - Terms and Conditions
 - Transactions

At the top right of the main area, there are buttons for 'Back', 'Reset', 'Delete Role', and 'Save Role'.

Setting permissions to Roles for changing order status

Install

- If you are an advanced administrator, you can unpack the archive with the resulting data and copy it to the folder where you store your Magento shop.
- You can also use standard functionality for installing the official Magento modules. To do this, go to System -> Magento Connect -> Magento Connect Manager.

The screenshot shows the Magento Connect Manager interface. At the top, there is a dark blue header with the text "Magentoconnect MANAGER". Below the header, there are two tabs: "Extensions" and "Settings". To the right of the tabs, there are two links: "Return to Admin" and "Log Out".

The main content area is divided into several sections:

- Settings:** This section contains two checkboxes. The first is checked and labeled "Put store on the maintenance mode while installing/upgrading/backup creation". The second is unchecked and labeled "Create Backup", followed by a dropdown menu currently showing "Database".
- Install New Extensions:** This section contains two numbered steps:
 - 1 Search for modules via [Magento Connect](#).
 - 2 Paste extension key to install: [input field] [Install button]
- Direct package file upload:** This section is highlighted with an orange border. It contains two numbered steps:
 - 1 Download or build package file.
 - 2 Upload package file: [Browse...] No file selected. [Upload button]
- Manage Existing Extensions:** This section is at the bottom and contains a "Check for Upgrades" button.

At the very bottom of the page, there is a large orange banner with the word "Install" in white text.

Locate the file that you downloaded from our website (it is in the same folder with this manual), and then click Upload. Magento installer will copy all the necessary files.

Then go to System -> Cache Management and refresh cache. Select all cache types, choose action Refresh and click on Submit.
